MAP 1 OF 2 · RESEARCH DATE 8 OCTOBER 2026

AI by output and workflow

What AI can produce, the tasks it helps with and the tools behind each, from a first idea to a finished output and a real-world action. Built for teams deciding what to try first.

21 SECTIONS · 259 TOOL ENTRIES · 241 DISTINCT TOOLS · 5 BRANCHES

BRANCHES
- Create — Words, images, video, sound, slides and boards
- Find and understand — Research the web and your own documents
- Plan and run events — From strategy to the live room and the follow-up
- Work and automate — Workflows, data, growth and operations
- Build — Sites, prototypes and internal apps

TOOL TYPES
- Model or model API — A model or model API you build on
- AI product — Built around AI from the start
- Creative application — Design, video and sound software with AI features
- Business platform — Business software with AI added; features vary by plan, region and module
- Automation or agent system — Connects apps; runs workflows or AI hosts agents

READING THE MAP
- Logo — Company artwork on a white plate; pending brand review before external use
- Logo not yet sourced — Shown as text in Inter, under Sources and notes
- Event-content thread — One event from insight to reuse, along the foot of the map
- Output — What AI can produce — Order and Operate list workflow steps instead

The tool lists are starting points, not rankings. Names and AI features were checked against current product sources; replaced and renamed products are listed under Sources and notes.
